btm today's meeting is later than normal due to the summit.
agenda: https://github.com/opscode/chef-community-irc-m...

wifi at the summit is dropping a lot of packets.   1:31 PM

nathenharv… holoway: hello!   1:34 PM

holoway hello web friends   1:34 PM

miketheman hello   1:34 PM

btm nathenharvey: are we going to play journey in the meeting room?   1:35 PM

shlant #hugops for all   1:35 PM

jonlives hi holoway and summitfriends!   1:35 PM

and other webfriends too of course :p   1:35 PM

miketheman verbal disputes over what "heavy metal" is acceptable is not easy   1:35 PM

nathenharv… jonlives: hello!   1:35 PM

juliancdunn too bad we can't have holoway's computer update the /topic based on the song that's playing   1:36 PM

holoway okay - let us begin   1:36 PM

nathenharv… Hello everyone and welcome back to the IRC meeting   1:36 PM

holoway the song is "dangerous but worth the risk"   1:36 PM

nathenharv… in Seattle, we have a room of people not speaking to one another.   1:36 PM

jaymzh   Hi Adam.   1:36 PM

juliancdunn   nathenharvey: feels like home   1:36 PM

kallistec still convinced "New World Order" is maximum apropos   1:37 PM

holoway   so - thanks for coming   1:37 PM

nathenharv...   and IRC meeting. My IRC is being projected in the room for those that just want to read along.   1:37 PM

holoway   for us, anyway, this is a first actual IRC meeting   1:37 PM

that involves the summit - we'll have another one in london   1:37 PM

nathenharv...   Today's agenda is here -https://github.com/opscode/chef-community-irc-m...   1:37 PM

icarus   aloha   1:37 PM

wdpro_kevin   I lurk in physical meetings too   1:38 PM

nathenharv...   but I'd like to suggest that we toss out that agenda and let holoway walk us through the CBGB and we'll circle back to our pre-announced agenda as time permits   1:38 PM

holoway   lets start the actual meeting   1:38 PM

if you want to play along, you can listen to Ratt's greatest hits, to get the full summit experience   1:38 PM

nathenharv...   yeah... *** Meeting Starts ***   1:39 PM

holoway   is there an agenda topic that needs addressing before we start   1:39 PM

juliancdunn   nathenharvey: I'd still like to close off & merge the platform support RFC today   1:39 PM

jkeiser How do I get some RFC discussions on the agenda? 1:39 PM

holoway https://github.com/opscode/chef-rfc/pull/58 <-- is the PR I just submitted for the governance and maintenance policy 1:39 PM

lets do that 1:39 PM

juliancdunn: can you paste a link to the PR? 1:39 PM

icarus does anyone find this midly autistic, haha 1:39 PM

shain +1 to julian 1:39 PM

juliancdunn stand by 1:39 PM

icarus mildy* 1:39 PM

atiniir mild? 1:39 PM

jaymzh indeed - my RFC isn't on there either. :(1:39 PM

juliancdunn it's all quiet and heavy metal is playing. I feel like I'm in Adam's head 1:40 PM

kisoku I had to fly to the US to be able to finally make one of these meetings :-P 1:40 PM

jkeiser I will want at some point to discusshttps://github.com/opscode/chef-rfc/pull/48,https://github.com/opscode/chef-rfc/pull/49 andhttps://github.com/opscode/chef-rfc/pull/50 1:40 PM

rarenerd kisoku: same here ;) 1:40 PM

jkeiser If there is time 1:40 PM

juliancdunn platform support RFC:https://github.com/opscode/chef-rfc/pull/21 1:40 PM

holoway	ok - lets take platform support	1:40 PM
nathenharv…	jkeiser: I'll capture those for the agenda also, you can always contact me or submit a PR to the repo where we set the agenda for these meetings	1:41 PM
jkeiser	ok! next time I'll do that, thanks	1:41 PM
juliancdunn	holoway: you want to do that now, or cbgb first?	1:41 PM
holoway	no, lets do this first	1:41 PM
	there was lots of discussion on this RFC	1:41 PM
	I think we should do two things	1:41 PM
	1) we should merge it as it stands	1:41 PM
	2) we should make it clear that we can, and will, update the RFC as we evolve	1:42 PM
jonlives	I'm +1 on both	1:42 PM
shain	+1	1:42 PM
holoway	any dissenters?	1:42 PM
holoway	you have 30 seconds to make with your -1	1:42 PM
tomduffield	should we have a specificly outlined changelog section to show when a platform is deprecated	1:42 PM
shain	but only if julian fixes this typo: "discrection"	1:42 PM
tomduffield	or should we just trust people to look at git history	1:42 PM
shain	;)	1:42

PM

holoway   tomduffield: lets trust the humans for now   1:42

PM

juliancdunn   shain: lol. that sounds rude doesn't it   1:42

PM

tomduffield   holoway sounds good to me   1:43

PM

+1   1:43

PM

holoway   okay - 10 more seconds   1:43

PM

miketheman   I think the appendix at the end explains per-platform cycles nicely   1:43

PM

holoway   okay - I'm putting my +1 on the PR   1:43

PM

miketheman   https://github.com/opscode/chef-rfc/pull/21/fil...   1:44

PM

jaymzh   +1 - but I've only just scanned it   1:44

PM

holoway   @coderanger I have approved said PR, make with the editing at will   1:44

PM

miketheman   +!   1:44

PM

coderanger   Reminder you can uncheck Show Notes to make reading easier on the diff screen   1:44

PM

holoway: Roger   1:44

PM

jonlives   coderanger: I'll grab this one if you want since you're summiting   1:44

PM

holoway   is there anything else that folks feel has broad consensus that we can just merge, before I derail?   1:44

PM

1 minute   1:44

PM

atiniir   should the specific components of chefdk be detailed explicitly   1:45 PM

coderanger   Might have to merge later once the internet works better   1:45 PM

nathenharv…   perhaps jaymzh's PR about attributes?   1:45 PM

jaymzh   pretty please?   1:45 PM

jonlives   coderanger: I'll grab it then :)   1:45 PM

holoway   nathenharvey: link?   1:45 PM

jaymzh   https://github.com/opscode/chef-rfc/pull/53   1:45 PM

kallistec   I think we reached consensus onhttps://github.com/opscode/chef-rfc/pull/20 though it could be edited for format   1:45 PM

nathenharv…   https://github.com/opscode/chef-rfc/pull/53   1:45 PM

holoway   also, we switched the music to Pantera, because people don't understand how amazing Ratt was   1:45 PM

jaymzh   holoway: I enjoyed both   1:45 PM

nathenharv…   https://github.com/opscode/chef-rfc/pull/53 is the chef 12 attributes PR from jaymzh   1:46 PM

atiniir   pantera sounds better out of those speakers, go figure   1:46 PM

jaymzh   though Phil Anselmo continues to be an ass   1:46 PM

c_t   now if we just had some real music   1:46 PM

miketheman   I'm a little concerned with adding more options to attribute precedences   1:46 PM

Dieseltime :%s/was/is/g   1:46
                                                                                   PM

miketheman especially wihtout having clear debugging techniques for "where did my   1:46
                attribute come from"?   PM

holoway miketheman: I think this doesn't actually add any more options - it just makes it   1:46
             clear   PM

jaymzh miketheman: chef 12 has some pretty awesome tools for that   1:46
                                                                                   PM

holoway miketheman: in particular, right now, you really can't safely delete anything   1:47
                                                                                   PM

jaymzh miketheman: at the moment, we - and many others - actually cannot move to   1:47
            Chef 11 because there's no way to wholesale overwrite keys   PM

            or delete things   1:47
                                                                                   PM

holoway and yeah, I think kallistec needs to publicize his tools for attr discovery   1:47
                                                                                   PM

             and debugging   1:47
                                                                                   PM

             kallistec: can you take an action to write (rewrite) a blog post?   1:47
                                                                                   PM

miketheman holoway: it adds more interfaces for the user to change attributes, not   1:47
                necessarily more levels   PM

coderanger +1, I still have to direct people to the chef 11 release blog post for info on   1:48
                node.debug_values   PM

kallistec I'm happy to do that, or we can republish jtimberman 's post   1:48
                                                                                   PM

miketheman and without kallistec on their team, figuring this out is a Hard Thing   1:48
                                                                                   PM

juliancdunn yes, customers ask for auditing/tracing tools all the time, so that'd be great   1:48
                                                                                   PM

Dieseltime why can't we safely delete things?   1:48
                                                                                   PM

jaymzh   Dieseltime: there's no way to delete things.   1:48 PM

coderanger   jaymzh: I'm still not sure why we aren't matching the normal Ruby names with rm_ and remove_   1:48 PM

jaymzh   .delete() doesn't do waht you thin kit goes   1:48 PM

miketheman   jaymzh: I look forward to new tracing and deubggin in Chef 12 - haven't seen that yet   1:48 PM

kallistec   either way, I'll take responsibility for getting it on the chef blog   1:48 PM

github-bawt   [chef-rfc] jonlives closed pull request #21: Platform support policy proposal (master...platform-support-policy) http://git.io/PNJgvA   1:49 PM

nathenharv…   holoway, kallistec: I've captured the action   1:49 PM

holoway   ok - I propose that this room look at 53, and in two weeks, we are merging it unless there are strong negative cases we haven't dealt with on the PR   1:49 PM

miketheman   jaymzh: might make sense to elaborate in the rfc why .delete() doesn't do what you think it does   1:49 PM

shain   I like this RFC for clarity of attributes.   1:49 PM

coderanger   +! on #53 functionality, I would just prefer to see the methods renamed   1:49 PM

holoway   nathenharvey: can you record that decision, so we remember to merge at the euro summit   1:49 PM

nathenharv…   got it   1:50 PM

holoway   lets take the conversation about it to the PR   1:50 PM

atiniir   great idea on the elaborate on the why of .delete()   1:50 PM

holoway   jaymzh: please to elaborate on the why of .delete() :)   1:50 PM

jaymzh miketheman: I'm not sure I can even explain that will without a very complicated dive into the way attributes work with the [] operators. the short version is ... you can only delete down to the sub-sub-hash of the precedence. ther's litterally no syntax for delete. node[f].delete will error out... and node.default[f].delete will delete cookbook_default but not role_default   1:51 PM

holoway lets put https://github.com/opscode/chef-rfc/pull/20/files on the list for merging at the euro summit as well   1:51 PM

jaymzh: put a paragraph in the PR   1:51 PM

jaymzh holoway: k   1:51 PM

holoway if you haven't read it, it's been open for a while, it's back-compat, and it will make things better for movning forward   1:51 PM

jaymzh holoway: miketheman other than that explanation - any objections?   1:51 PM

holoway but here is your heads up   1:51 PM

juliancdunn is monkeypatching .delete() on the Mash too disgusting? 'cause otherwise people might continue to use it   1:52 PM

atiniir jaymzh: i think even than or a wee bit more would be fine. give people a jumping off point to understand more if they want   1:52 PM

holoway ok - in the interest of time, lets move on   1:52 PM

please take the conversation to the PR   1:52 PM

juliancdunn roger   1:52 PM

miketheman jaymzh: I guess it's not entirely clear to me as to what interfaces will exist, rm_default vs remove and other operatios, and where they are used.   1:52 PM

holoway: roger, will contiune there   1:52 PM

holoway so 53 and 20 are both on the docket for merge, and I expect a flurry of good times on 53 at least   1:53 PM

nathenharv… | Next agenda item then is #58 - https://github.com/opscode/chef-rfc/pull/58 | 1:53 PM

IronYuppie is now known as DavidAronchick | 1:53 PM

Proposed governance and maintenance policy | 1:53 PM

github-bawt | [chef-rfc] coderanger pushed 1 new commit to master: http://git.io/Ix4wUw | 1:53 PM

chef-rfc/master 0fd9db6 Noah Kantrowitz: After written confirmation from Julian on IRC, add copyright disclaimer. | 1:53 PM

shain | fyi holoway: in the future we may want to specify PR53 and PR20, since there already is an RFC20 != PR20 | 1:53 PM

holoway | ya | 1:53 PM

thanks | 1:53 PM

those are PR# | 1:53 PM

jonlives | I am very excited about #58. | 1:54 PM

holoway | so, lets talk 58 | 1:54 PM

j^2 | RE: PR 58, i put a comment about the total number of people, an even number could be challanging at a later date? no…tie breakers? | 1:54 PM

holoway | this is the culmination of trying to think about how to be more explicit about our behavior, that started a few months back | 1:54 PM

IronYuppie is now known as DavidAronchick | 1:54 PM

coderanger dances, ♪ ⌐(·o·)┘ ♪ └(·o·)¬ ♪ | 1:54 PM

j^2: luckily, the governance board doesn't actually decide anything | 1:54 PM

as a refresher, there are two things specified in this PR   1:54 PM

one is the creation of a maintenance policy   1:55 PM

j^2   holoway: true, but at the same time advice is can still get hairy too though right?   1:55 PM

holoway   that is how we manage Chef (and any attendent product we wants)   1:55 PM

the other is the governance board (from here on the CBGB, for greater awesome)   1:55 PM

the CBGB is the way people have a formal voice who aren't actively maintaining the code   1:56 PM

one thing that was important to me was that we be clear that the decision making authority rests with the people doing the work   1:56 PM

jonlives   holoway: you excepted, does being a member of the CBGB exclude being a maintainer or vice versa?   1:56 PM

holoway   who are closest to the problem   1:56 PM

miketheman   and to be clear, CBGB is _not_ MAINTAINERS?   1:56 PM

or what jonlives said   1:56 PM

holoway   jonlives: no - and in particular, 3 of the CBGB are LTs   1:56 PM

jonlives   coolio   1:57 PM

holoway   but 4 of those seats are for users, and my hope is they aren't contributors   1:57 PM

j^2   Should the LTs be from a small medium and large project/cookbook?   1:57 PM

so you have a full scope of different issues for different sizes?   1:57 PM

atiniir holoway: doing the work and closest to the problem might not be == ?   1:57 PM

holoway j^2: maybe? one thing I wanted to be careful about was too much process design up front   1:57 PM

j^2 holoway: understood, just a thought   1:57 PM

holoway j^2: I think that would be great, I'm not sure we need to formalize it   1:58 PM

j^2 agreed   1:58 PM

holoway atiniir: right - you could be a user with an issue.   1:58 PM

atiniir: the important bit to understand is that the people with the authority are the people who can do something about it - not the other way around   1:58 PM

ie: we're the boss of us   1:58 PM

;)   1:58 PM

miketheman holoway: I was unclear as to who drives the roadmaps - it appears that both maintainers and CBGB own that   1:58 PM

holoway miketheman: yeah - I'm unclear about that too, because I think its a great idea to have a roadmap   1:59 PM

shain I like this as a "let's try and see what happens" - it feels like MVP. Any more might be overengineering O.o   1:59 PM

holoway miketheman: and I've gotten pretty good in the last few years at the roadmap process for a company   1:59 PM

miketheman: I have almost no idea how to map that to a community   1:59 PM

miketheman: although I expect it's probably identical?   1:59 PM

the maintainers own the roadmap, the CBGB provides input   2:00 PM

miketheman	holoway: I think it totally maps to companies and projects	2:00 PM
atiniir	holoway: users who participate in discussion / testing would then be able to influence maintainers, and it'd be against a maintainers interest to just ignore users.	2:00 PM
miketheman	holoway: but a roadmap for the community	2:00 PM
	?	2:00 PM
holoway	ok - well, then the roadmap starts with me talking about what we want to accomplish in the next year at a high level	2:00 PM
atiniir	that was might to have a ', yeah?'	2:00 PM
holoway	and then breaking that down to the individual teams/areas that need to have a plan	2:00 PM
	and we decide whats in or out based on how it helps us achieve our goal	2:00 PM
miketheman	"The primary purpose of the CBGB is to advise the Leadership on matters related to supporting the long-term governance, structure, and roadmap of the Project." <= so this would mean the CBGB doesn't own the roadmap, but helps maintainers decide direction?	2:01 PM
holoway	miketheman: bingo	2:01 PM
	ctracey_ is now known as ctracey	2:01 PM
	paulmooring is now known as paulmooring_away	2:01 PM
	CBGB only ever advises	2:01 PM
	maintainers decide	2:01 PM
jonlives	as it should be.	2:01 PM

juliancdunn   I need time to digest and meditate on this PR   2:01 PM

atiniir   aye tis good   2:01 PM

shain   so say we all   2:01 PM

holoway   (in real life, I was fist-bumping barry crist)   2:01 PM

miketheman   holoway: got it. so https://github.com/opscode/chef-rfc/pull/58/fil... might need some polishing   2:01 PM

holoway   out intent is to have this open for discussion here, and at the next meeting as well   2:02 PM

I'll publish a blog post about it, and post to the list, after this meeting   2:02 PM

miketheman   cool.   2:02 PM

holoway   we'll take input, polish it up, and then adopt   2:02 PM

the one thing I want to bring up   2:02 PM

is we need to have some LTs   2:02 PM

I put some draft slots in the PR to make it clear what kinds of areas feel like they make sense   2:03 PM

but the list is far from exhaustive   2:03 PM

one thing I was hoping to deal with here is the question of whether we want to hold on formalizing adding any LTs or Maintainers   2:03 PM

until the RFC is merged   2:03 PM

In real life, I'm looking at coderanger   2:03 PM

haz you feels on that topic?

2:04 PM

miketheman LTs on CBGB or MAINTIANERS?

2:04 PM

kallistec watches coderanger make with they typey typey

2:04 PM

holoway maintainers

2:04 PM

atiniir will various roles have 'terms' (as in duration)

2:04 PM

holoway the LTs on the CBGB are LTs from maintainers

2:04 PM

coderanger I haven't gotten down to the maint policu

2:04 PM

atiniir going on LT could be daunting if it's for life

2:04 PM

miketheman (btw - having multiple LTs might get confusing)

2:04 PM

holoway atiniir: the CBGB has a 12 month term, the LTs and Maintainers are until they remove themsleves with a PR

2:04 PM

juliancdunn shain: I know what I'm nominating you for

2:05 PM

coderanger but if it is similar to the last draft I think it should should be a +2 thing, if two existing maintainers think you should be in, you are in

2:05 PM

miketheman unless the CBGB LTs are actually maintainer LTs?

2:05 PM

holoway miketheman: I think its important to have LTs for specific subsystems

2:05 PM

jonlives atiniir: it's open source - nobody can force you to stay on longer than you want to :)

2:05 PM

icarus coderanger deserves honorary medals for his irc help

2:05 PM

shain sends a dirty look at julian 2:05 PM

coderanger Keeps things easier than a full-quorum vote 2:05 PM

atiniir holoway can you explain how that would work ? or should i rtfrfc 2:05 PM

holoway miketheman: they are maintainer LTs who are voted in 2:05 PM

yes 2:05 PM

coderanger but makes sure there is some oversight 2:05 PM

holoway let me summarize the maint policy 2:05 PM

jaymzh2 yeah, MAINTAINERS should be similar to kernel - you can remove yourself, or people can request your removal, but it shouldn't be specific terms 2:05 PM

holoway basically, it starts with me 2:05 PM

jonlives ^ +1 this 2:05 PM

atiniir jonlives: sure by the cyberbullying these days... 2:05 PM

by = but 2:05 PM

jonlives atiniir: in all seriousness, that's whyhttps://github.com/opscode/chef-rfc/blob/master... has already been approved 2:06 PM

j^2 jonlives: true dat 2:06 PM

holoway I'm the first project lead, and my job is to to resolve disputes, provide direction, and delegate. I also have final veto power. 2:06 PM

coderanger Lts should probably be handed fuzzily until we figure out what they are going to actually be 2:06 PM

atiniir | jonlives: kk ty | 2:06 PM

coderanger | Like will we have a LT for commuinty (nathenharvey)? | 2:06 PM

shain | +1 coderanger | 2:06 PM

atiniir | +1 | 2:07 PM

jaymzh2 | +1 | 2:07 PM

holoway | the plan is to delegate areas of Chef (and software that is associated with it) to LTs, who have authority (and a veto) over changes to their area | 2:07 PM

jaymzh2 is now known as jaymzh | 2:07 PM

those areas also have Maintainers | 2:07 PM

all of those people have commit bits to Chef and attendant projects | 2:07 PM

paulmooring_away is now known as paulmooring | 2:07 PM

coderanger: +1 | 2:07 PM

coderanger | For LTs right now, I would want to see it just done via pull req so there can be a public discussion, and trust holoway to thumbsup appropriately (if he is okay with that responsibility) | 2:07 PM

holoway | when a PR comes in, the maintainers and LT for the areas it touches do a +1 with simple majority causing a merge. If the simple majority becomes too onerous, we can change the rules | 2:08 PM

coderanger | The first few will probably be whomever wants to volunteer | 2:08 PM

j^2 | coderanger: seems reasonable | 2:08 PM

miketheman | so to be perfectly clear, the LT position is a involved-with-code position | 2:08

PM

jaymzh   holoway: how does one request to be a MAINTAINER for a thing that's not on the list? PR? so like, would I submit a PR putting my name in as an LT for, say, Attributes, and then discussoin ensues?   2:08 PM

holoway   coderanger: yeah - I think we shouldn't add any LTs until we approve the RFC, then start PRs   2:08 PM

jaymzh   holoway: ah, you mostly answered that   2:08 PM

holoway   jaymzh: that was my vision - you can propose a section, make yourself the LT, and then we talk   2:08 PM

coderanger   holoway: Fair, though getting an idea of interest from the community starting now seems prudent   2:08 PM

holoway   miketheman: yes   2:08 PM

coderanger   At least to get an idea if the fiefdoms are split up appropriately   2:08 PM

holoway   coderanger: and they probably aren't :)   2:09 PM

   I think operating system support is one that will be obvious   2:09 PM

coderanger   Like is "Ubuntu" good? Or should it be per version? etc   2:09 PM

holoway   coderanger: please god let it not be per version   2:09 PM

miketheman   coderanger: I think a blanket area is a good place to start   2:09 PM

coderanger   Or will all the Linux teams step on each others toes all the way   2:09 PM

jonlives   LTs all the way down :p   2:09 PM

coderanger   holoway: 14.04 seems to be enough of a special snowflake some days ... :P   2:09 PM

miketheman   LTS != LTs   2:09

PM

jaymzh | holoway++ | 2:10

PM

holoway | also, its prudent that we'll use the RFC process to change the policy as needed | 2:10

PM

miketheman | 20 minutes | 2:10

PM

coderanger | Basically for right now I think we should just let the delegated teams self assemble a bit, see who is interested in each area | 2:10

PM

holoway | coderanger: +100 | 2:10

PM

jonlives | holoway: re the requirement for maintainers to attend dev meetings etc, what happens about those in inconvenient timezones? | 2:10

PM

miketheman | +1 | 2:10

PM

coderanger | And from that draw out the leadership structure | 2:10

PM

holoway | jonlives: we make an exception :) | 2:10

PM

jonlives | coolio | 2:10

PM

holoway | jonlives: we should change the doc in the PR | 2:10

PM

coderanger | So the action item is to make a space for those teams to assemble | 2:10

PM

jonlives | holoway: I'll add a note | 2:11

PM

coderanger | Maybe just a public google doc? | 2:11

PM

holoway | I have a suspicion that people will want to start actually signing up faster than we merge the PR | 2:11

PM

coderanger | Thats probably the lowest-friction option | 2:11

PM

martinisoft	Wanted to ask if anyone has stepped forward or is there any place for FreeBSD support in the maintainer area. If not then I am not seeing how to propose this since the 'how chef is maintained' document is not created yet.	2:11 PM
jaymzh	holoway: that'd be a good problem to have.	2:12 PM
holoway	martinisoft: there is a place for that! if you want to be the LT for FreeBSD, I +1 you right now	2:12 PM
kallistec	I recall from previous meeting that we wanted an LT to emerge from a non-western hemisphere timezone and that person would then lead a second IRC community meeting at a good time for them and geographically similar folks	2:12 PM
holoway	martinisoft: and I look forward to the FreeBSD merge storm	2:12 PM
shain	I know at least 4 people who would LOVE an LT for freebsd	2:12 PM
holoway	martinisoft: it's a great example, because I haven't used freebsd in years - so I'm so deeply unqualified to maintain it	2:13 PM
martinisoft	I run a FreeBSD fileserver at home. Chef is tricky there and I want to make it better.	2:13 PM
coderanger	holoway: We also need to grok how this maintenance policy fits in with stuff outside chef client/server (cookbooks, social stuffs, etc)	2:13 PM
holoway	coderanger: yeah - I have some thoughts there	2:13 PM
miketheman	kallistec: it definitely brings up the idea of async meeting and mailing list decision-maing	2:13 PM
coderanger	holoway: Like we talked before about molding the RFC process to look kind of like this model too :)	2:13 PM
holoway	basically, I was thinking about adding a section that talks about the fact that an LT can be over a completely different project	2:13 PM
	for example, Mixlib::Shellout	2:14 PM
jonlives	holoway: it seems like a lot of the components fit under the chef repo - the maintainers file is gonna get pretty busy methinks	2:14 PM
juliancdunn	coderanger: also, the ecosystem tools like TK, chefspec, etc.	2:14

PM

atiniir | so. many. words. | 2:14
PM

martinisoft | holoway: So at least in #58 I don't see a FreeBSD section. Should I comment in the PR? | 2:14
PM

holoway | or maybe fnichol decides he wants to use this model for TK | 2:14
PM

kallistec | miketheman: yes, that's good generally (I'm more active on ML than IRC because I can do it at a time that's convenient for me) but it's good to have a real-time meeting so you can get ppls attention if you need it | 2:14
PM

holoway | martinisoft: yeah - post merge, you could just send a PR, put yourself there, and viola | 2:14
PM

 | atiniir: this is the short version! | 2:14
PM

 | ok, I have a need for a real life bio break, because of all my coffee | 2:15
PM

 | the role of me will now be played by barry crist | 2:15
PM

atiniir | holoway: note to self, get a screen reader | 2:15
PM

holoway | time to party | 2:15
PM

miketheman | kallistec: no doubt, which is why in-person exists. We can chat offline about that further | 2:15
PM

nathenharv… | Barry_: has the holoway keyboard ;) | 2:15
PM

jonlives | holoway: in the short term, do initial volunteers for LT PR against the relevant repo, or against this RFC proposal? | 2:15
PM

martinisoft | holoway: Cool. So the how chef is mainted doc would also be part of that RFC merge or separate? | 2:15
PM

btm | holoway: (Barry) what do you think about CGBG quorum/voting? It looks like there's some responsibilities under Operation that would require being clear about that. | 2:15
PM

coderanger | One thing that I think is possibly implicit is what happens is there is more than one LT for a subsystem | 2:16 PM

martinisoft | holoway: Actually, what jonlives just said :D | 2:16 PM

juliancdunn | btm: you may need to teach Barry how to use IRC | 2:16 PM

coderanger | Do we just not do that? | 2:16 PM

holoway | hey now. | 2:16 PM

adamleff | jonlives: I'd love to see it in a single place so there's one place to look, vs. trying to enforce a document standard across N number of repos. | 2:16 PM

btm | juliandunn: I think the "type in that box" instructions were more than adequate. ;) | 2:16 PM

holoway | [Barry] agree we should be clear about responsibilities re: Operations. | 2:16 PM

jonlives | that's kind of the way I was leaning too, just clarifying what the intent was | 2:16 PM

coderanger | 15m warning | 2:16 PM

miketheman | I move that this get a lot more eyeballs reviewing the PR | 2:17 PM

nathenharv... | +1 | 2:17 PM

shain | +1 | 2:17 PM

holoway | yep | 2:17 PM

Barry_ | that was fun | 2:17 PM

holoway | so, lets talk about timelines | 2:17 PM

miketheman: I agree, we need way more eyeballs — 2:17 PM

I say we do what coderanger suggested, and make the maintainers file a google doc right now — 2:18 PM

and let folks suggest — 2:18 PM

meanwhile, we keep the PR open for actual changes to process/meaning/etc — 2:18 PM

miketheman | both section (project) addition, as well as LTs — 2:18 PM

adamleff | I know it was brought up the last time that the blog was for stuff that was "finished" and ready for consumption, but I move that a PR of this significance may be a perfect time for a blog post with some accompanying language as to holoway's vision for this, etc. — 2:18 PM

holoway | adamleff: yeah, I have that ready to go — 2:19 PM

jonlives | holoway: +1 on the google doc — 2:19 PM

adamleff | w00t — 2:19 PM

zz_gondoi is now known as gondoi — 2:19 PM

holoway | adamleff: as PAntera is saying right now, i just need 5 minutes alone — 2:19 PM

:) — 2:19 PM

on CLAs - we're talking with lawyers — 2:19 PM

I think it would be great to move to Developer Certificates of Origin — 2:20 PM

nathenharv… | 10 minutes 'til end of meeting — 2:20 PM

Barry_ | would like to lower barrier on CLA's... actively working on this. — 2:20 PM

holoway	but, and Barry_ can correct me, I don't think we're all the way there yet on what that does to risk	2:20 PM
DavidAron…	coderanger: I'm not sure i'm 100% on the "more than one LT" per subsystem. Can you explain more?	2:20 PM
miketheman	4 updates yet to be covered	2:20 PM
holoway	coderanger: I don't think there will be more than one LT per subsystem. lots of maintainers, one decider	2:20 PM
juliancdunn	can we move to the other items, since we need to let this bake out	2:20 PM
DavidAron…	coderanger: (can cover offline due to short time)	2:20 PM
holoway	yep	2:20 PM
Barry_	right.... I think this is mostly about us getting comfortable but also some real issues.	2:20 PM
holoway	lets move	2:20 PM
coderanger	holoway: That should be slightly more explicit then :)	2:21 PM
holoway	coderanger: you and your explicit	2:21 PM
	but I agree	2:21 PM
	one LT per subsystem	2:21 PM
coderanger	holoway: I <3 words	2:21 PM
holoway	I respect it	2:21 PM
	okay	2:21 PM

nathenharv…	OK. so we move the CBGB discussion to the PR / blog / ML and move this meeting on to updates	2:21 PM
jonlives	if there's 1 LT the appeals process should also be documented	2:21 PM
	ie appeal to decider	2:21 PM
holoway	jonlives: it is to the project lead	2:22 PM
	to use the veto	2:22 PM
	thats the process	2:22 PM
	okay - lets move on to other business	2:22 PM
	looking forward to vigorously stretching the limits of what a PR can do	2:22 PM
	:)	2:22 PM
nathenharv…	First update is from the community: The summit is underway in Seattle, we're holding our next Summit in 2 weeks in London	2:22 PM
	hope we'll meet IRL at one or both	2:22 PM
ssd7	(Thanks to everyone at the summit for doing this meeting on IRC, much appreciated)	2:23 PM
nathenharv…	that's the quick community update	2:23 PM
Barry_	... got to run. thanks everyone!	2:23 PM
nathenharv…	sersut: chef-client update?	2:23 PM
sersut	On the client side we will be announcing a new Chef DK release (0.3.0) with the first working prototype of Policyfiles..	2:23 PM

	watch out the blog for more information on this… it'll land very soon..	2:24 PM
jonlives	ooh shiny!	2:24 PM
adamleff	(thumbsup)	2:24 PM
tech356	Will Policyfiles land for 12?	2:24 PM
holoway	kallistec: I think that also drives the cookbook version stuff	2:24 PM
	kallistec: we should close on that next meeting	2:25 PM
kallistec	agree	2:25 PM
holoway	kallistec, acn you answer tech356	2:25 PM
sersut	Policyfile feature will be an ongoing work… this version is the first preview version so it'll be a while before it's finalized..	2:25 PM
nathenharv…	5 minutes	2:25 PM
holoway	yep - and since we aren't breaking existing interfaces, we can ship it quickly and iterate	2:25 PM
kallistec	tech356: there's some server support we need for this to work well that will not be in 12.0.	2:25 PM
	server changes will be backcompat, so they can be added at any time	2:26 PM
holoway	nathenharvey: can you make an appeal for communtiy advocates?	2:26 PM
tech356	kallistec: is there a target release or just when it is ready?	2:26 PM
nathenharv…	please, can we have some community advocates	2:26 PM

kallistec   chef-client supports policyfiles right now in "compatibility" aka "kludge" mode   2:26 PM

holoway   hahaha   2:26 PM

how do they become one?   2:26 PM

juliancdunn   what is a "community advocate" ?   2:26 PM

btm   nathenharvey: can you put the lunch time of the summit on https://www.getchef.com/summit/ ?   2:26 PM

nathenharv...   PR's to https://github.com/opscode/chef-rfc/blob/master..., nominate yourself or other as community advocate   2:26 PM

holoway   the current mode is about learning how it feels, then we'll rock a great implemetnation   2:26 PM

lets have a goal to have a few folks volunteer by the next irc meeting in london   2:27 PM

nathenharv...   btm: lunch today is 12:30. agenda is also herehttps://github.com/opscode/chef-summit-2014/wiki   2:27 PM

juliancdunn   hotel staff is playing the xylophones, so I gues we need to wrap up   2:27 PM

jkeiser   I need to hit this next session, and I'll be pretty active in it, so can you guys handle looking at my RFCs (or can we do them before)   2:27 PM

holoway   ok   2:27 PM

holoway waves   2:27 PM

thanks for coming   2:27 PM

kallistec   tech356: things will come out as we finish them, don't have a specific timeline.https://github.com/danielsdeleo/policyfile-jenk... gives you a feel for what is working now   2:27 PM

holoway   see all you crazy cats   2:28 PM

nathenharvey: so endeth the meetingth   2:28
                                                                         PM

jkeiser I don't know if there is enough time alotted to deal with both RFCs and "the big   2:28
             questions" here   PM

nathenharv… holoway: a more elaborate appeal for advocates will be posted to blog and ML   2:28
                 soon. And yes, we should have some by London summit   PM

             Meeting Over   2:28
                                                                                         PM
